

Anatomy and Problem-Solving Creations Syllabus

Here is a list of the class topics I am planning on covering in the Anatomy and Problem-Solving Creations course. The order in which I teach the topics is subject to change. Sometimes, I will change the topics during the semester because I'll find a lab I like even more and will teach that instead of what I had planned.

Week	Topic
1	Skeletal System
2	Bones
3	Create a Prosthetic Leg
4	Create a Prosthetic Leg
5	Circulatory System
6	Blood Typing
7	Unblocking a Clot
8	Respiratory System
9	Create a Pollution Facemask
10	Digestive System
11	Design a pill
12	Living with your Liver
