

Elephant Toothpaste

2 Tablespoons Warm Water

1 Teaspoon Yeast

Food Coloring, 4-5 drops

½ c. Hydrogen Peroxide (3%)

Dish Soap, a large squirt

Empty Plastic Water Bottle

Funnel

2 Cups

measuring cup

Large bowl or cake pan

1. In the white bowl or a cup, combine 2 tablespoons warm water with 1 teaspoon yeast and mix until the yeast is completely dissolved in the water.
2. Put bottle in a pan so it doesn't spill all over.
3. Measure ½ c. hydrogen peroxide.
4. Using a funnel, pour 1/2 cup hydrogen peroxide into the empty bottle.
5. Add a 5 drops of food coloring into the bottle.
6. Add a large squirt of dish soap into the bottle and give it a gentle swirl to mix.
7. Using a funnel, pour the mixture of water & yeast into the bottle. Remove the funnel. Hold onto the bottle. ***What do you notice about the temperature?***
